DETAILED ACTION

Election/Restrictions

- 1.** Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-27, drawn to method of coating of tungsten, classified in class 427, subclass 250.
 - II. Claims 28-43, drawn to method of forming tungsten for use in memory cell, classified in class 438, subclass 685.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as mutually exclusive species in an intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (MPEP § 806.04(b), 3rd paragraph), and the species are patentably distinct (MPEP § 806.04(h)). In the instant case, the intermediate product is deemed to be useful in product other than memory cells for example, method for a tungsten capacitor, and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 2.** Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 3.** During a telephone conversation with B. Todd Patterson on May 02, 2003 a provisional election was made with traverse to prosecute the invention of Group I, claims 1-27. Affirmation of this election

must be made by applicant in replying to this Office action. Claims 28-43 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
